

Doctor Hoy's Natural Pain Relief Gel

DOCTOR HOY'S Natural Pain Relief Gel is a revolutionary new pain relieving gel that uses only the highest quality ingredients. It can be used for back pain, neck pain, muscle aches, sprains, joints, strains, minor arthritis, stiffness and more. Our menthol and camphor formula is cool when applied then gradually warms to provide comforting pain relief.

BENEFITS OF DOCTOR HOY'S NATURAL PAIN RELIEF GEL:

DOCTOR HOY'S is a water-based product - it contains no oil or petroleum. This characteristic is very important for many reasons. For example, because DOCTOR HOY'S contains no oil or petroleum there won't be a messy or greasy residue after using the product. In addition, it won't stain your clothing or leave a lingering odor.

DOCTOR HOY'S offers fast and effective pain and muscle relief - again, because the product is water based it is easily absorbed into the tissue where applied resulting in a faster acting, more effective product.

DOCTOR HOY'S can aid in the relaxation of muscles prior to and after physical activity. Because menthol leads to an increase in blood circulation and oxygen flow, applying the product can be very beneficial in many situations. For example, when muscles contract, the cells within the muscle use more oxygen and produce more waste products. An increase in blood circulation aided by DOCTOR HOY'S will allow the muscles to get the needed oxygen and also assist in removing the increase in waste produced by the muscles.

DOCTOR HOY'S won't leave a lingering odor - because many products are oil or petroleum based, the product is not easily absorbed and "floats" on the skin resulting in a less effective pain relief product and a lingering odor.

DOCTOR HOY'S is PH balanced - healthy skin has a mean PH level of 5.5. The desirable PH range for skin care products is between 4 and 7. Products that fall outside of this range can dry or irritate the skin. We have worked to create a product that has a PH level very close to the mean PH level of 5.5. This helps reduce the chances of irritation or drying out the skin.

DOCTOR HOY'S contains a timed-release menthol delivery system - this helps deliver extended pain relief. The timed-release menthol system consists of small microscopic capsules of menthol that are absorbed into the tissue. Once absorbed, these capsules release pain-soothing menthol over an extended period of time offering longer pain relief.

DOCTOR HOY'S contains skin moisturizers and softeners such as Fucogel and Glycerin. These ingredients help the skin retain moisture and leave the skin soft. In addition, we use Zanthoxylum Alatum (Szechwan Pepper), which helps protect the skin from irritation.

DOCTOR HOY'S contains Visible Vitamin E - a natural skin moisturizer, which leaves a beneficial antioxidant on the skin.

No animal testing or animal oils - we don't test our product on animals nor do we use any type of animal oil in our product.
